ANNA H. ZINKWEG
the Netherlands

The project would modify considerably the canal banks in order to improve the surroundings of the Centre Administratif of the Place de l'Etoile and the south bank of the Bassin d'Austerlitz. It is thus deliberately reshaping the whole area and could dramatically affect this part of the outer water belt of Strasbourg.

The project links a monumental approach with a sensitive but discrete reminiscence.

It flows over the site as an extended off-shore pier ■
